

Our Involvement & Co-production Promise

We follow the principles below to make sure everyone is heard and respected.

1

Young people and families and carers will be central to any co-production opportunity.

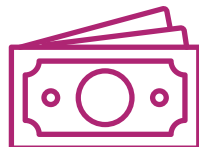

2

You will be supported throughout your involvement as an Expert by Experience by us.

3

You will be rewarded fairly for participating in any involvement or co-production activities.

4

You will be able to access training to support you to join activities and to help with your skills development.

5

We will ensure that young people and families and carers will regularly be informed about the outcomes and impact of their involvement.

6

Co-production and involvement will be embedded at every level in the Provider Collaborative, from individual care to governance.

7

We will ensure equal access to co-production and involvement in our work and celebrate diversity in our involvement opportunities.

8

We will use different methods of co-production and communication to ensure accessibility in our opportunities.

9

We will co-evaluate co-production and involvement to ensure that it is being as impactful and effective as possible.

10

We will build on the work of our Lived Experience Involvement Strategy, identifying areas of work where co-production can have a real impact and involve young people, families and carers from the early stages.
